## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/007403

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement			
Novelty (N)	Claims	1-10	YES
	Claims		NO
Inventive step (IS)	Claims	1-10	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-10	YES
	Claims		NO
2. Citations and explanations (Rule 70.7)			
1. Prior art			
Reference is made to document EP 0940278 A (D1), which is considered to be the closest prior art.			
2. Technical problem			
The problem addressed is that of providing an alternative slide-swivel double-door arrangement for a motor vehicle, which arrangement can be used, in particular, in vehicles having a driver's cab that is short.			
3. Solution to said problem			
The problem described above is solved according to the invention by means of the special kinematic design of the door arrangement. Said door arrangement is configured such that, when the door is open, the two slide-swivel doors are mutually parallel. Thus, when open, the two doors are together on one side of the associated opening and the overall length of the vehicle can be reduced.			

## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/007403

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;  
citations and explanations supporting such statement

The vehicle door disclosed in D1 (and the arrangement thereof) consists likewise of two door-leaves (or doors) that are opened and closed in a slide-swivel manner. However, the two doors are moved in opposite directions when being opened and, in consequence, are arranged in symmetry relative to the door opening in a common plane. No alternative kinematic design is disclosed in document D1, or obvious therefrom.

Thus, the aforementioned problem is solved by means of the combination of features according to independent claim 1, which features are not known from the prior art. Said claim, and also dependent claims 2 to 10 can therefore be considered to be novel, inventive and industrially applicable (PCT Article 33(2), (3) and (4)).

## Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

**Further observations**

Independent claim 1 has been duly drafted in the two-part form, but a number of features should not have been included in the characterising part, since they were disclosed in D1 in conjunction with the features indicated in the preamble (PCT Rule 6.3(b)). This applies to all the features in the characterising part of the present claim, with the exception of the following feature: *"that, when open, the second slide-swivel door is disposed in a third plane that is parallel with the second plane but displaced outwards, being close to the first opening region and also outside the side wall"*.

In addition, document D1 should be cited as prior art in the **description** (PCT Rule 5.1(a)(ii)).
